

THE PERFECT MATTE

MATTETM
WHITE

galalite[®]
LEADERS IN CINEMA SCREEN TECHNOLOGIES SINCE 1959

FEATURES

Galalite's Matte White is a matte finish front projection screen. Its perfect matte surface gives a broad light dispersion and spectral uniformity. Matte White screens are whiter than any other matte white screens on the market and have a much longer life due to Galalite's unique formulation. Added Optical Brighteners require no color correction during projector setup. *Unique seam welding process provides invisible seams resulting in seamless clarity and visuals for an enhanced movie viewing experience.*

AVAILABLE IN
